

Hi!

Thank you for your interest in DJPower!

The password to the demo version of DJPower is: "DANCE".

After downloading, double click on the icon and it will install DJPower. Since there are no songs in the download version of DJPower Demo, you cannot play songs unless you have songs of your own. If you do not already have mp3 files, you will have to download some mp3 songs from the internet to try out DJPower. We suggest that you download them before installing the DJPower demo, as DJPower will scan your hard drive to find your songs...

We hope the following information can answer many questions you may have:

DJPower International LLC offers an audio only software only package: DJPower Pro. The core package includes twelve months of free updates plus three months of free phone technical support. An easy to read user's manual which describes every step in detail is also included in the price. For a total of only \$699, you will also get our 160 hot buttons, EQ and Dual Beat Mixer. Other features with prices can be found at http://www.djpower.com/Products_Pro.htm

We also offer complete packages which include either DJPower Pro or DJPower Xtreme on a rackmount, a lunch box, a desk top or a laptop. The price of this package varies depending on the hardware system. Please visit <http://www.djpower.com/hardware.htm> to view our selections.

DJPower also offers add-ons. Our Xtreme Version (available only with a full hardware system) allows for scheduling and playback on multiple channels or multiple rooms. It allows for playback and mixing of video and/or karaoke from the same play list as the audio. It also offers video beat mixing and FX. It also offers integration with Martin LightJockey and other DMX light controllers. Plus much more! More information can be found at http://www.djpower.com/Products_Xtreme.htm.

Radio Remote controls are optional. These allow the DJ to entertain and spend time with the guests, not the equipment. The range is up to 150 feet from the computer, even if there is a wall in the way. The receiver attaches to your computer and allows full control of basic functions: Song Selection, lighting control, pitch, volume, talk, play, pause, restart, skip, mute, stop and lock (other features are also customizable). The price for an RF remote control is \$169.00.

All the above prices are in US dollars.

How to order:

Upon receiving your order by email, fax or phone, we will send you the latest version of the program on a CD. When you have purchased and installed the full program, contact our office by phone to obtain the pass code. This pass code will open the software lock and will allow you to have full use of the program. We require full payment prior to sending the program.

The DJPower Demo version 2008 **recommended system requirements** are as follows:

2.2 GHz Pentium 4® or Intel Core 2 Duo 1.66 Processor

3.0 GHz Pentium 4® or Intel Core 2 Duo 2.4 Processor (for video or Martin LightJockey add-ons)
Windows®2000, Windows®XP.

1 GHz RAM

(2 GHz RAM or higher is recommended for video mixing or Martin LightJockey add-on)

19MB free disk space (program only)

Enough free disk space for your music and videos

CD-ROM drive

16 bit (high color) and 800x600 graphics (1024X768 recommended) (not shared graphic memory)

128 MG Video-RAM (not shared graphic memory) video card (for video playback)

(ATI not recommended)

24 bit duplex sound card with bass & treble adjustment – Direct X compatible

NOTE: If you do not have these requirements, we recommend that you DO NOT install the demo on your computer at this time.

NOTE: We recommend disabling Hyper-Threading on your computer.

NOTE: If Windows XP Service Pack 2 is installed, we recommend that either Service Pack 2 be uninstalled, or that DEP be disabled.

* **NOTE:** Running at the minimum requirements processor and RAM needed will allow you to run the minimum of DJPower's features.

Again, thank you for your interest in DJPower. If you have any further questions, please let us know. We'll be more than happy to answer them.
