

DJPower MESSENGER / BANNER Overview

The Messenger / Banner is one of the most useful features in DJPower. It is easy to program and operate. A variety of messages can be sent to audience with variety of the color, fonts, size, speed and scroll directions.

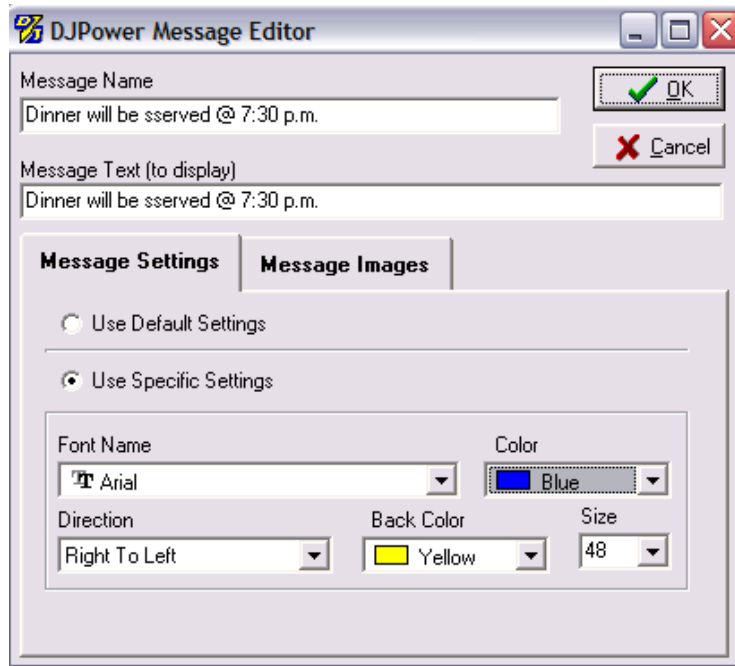

An unlimited number of messages can be generated and save it. Messages can be assigned to songs, videos, pictures, Visualizer images or camera images. The Bulletin Board can be active during video playback, but inactive during image show. Messages can be typed in real time and will appears on audience's screen at the same time.

To open the Messenger center, click on the Messages button at the bottom of the main DJPower screen..

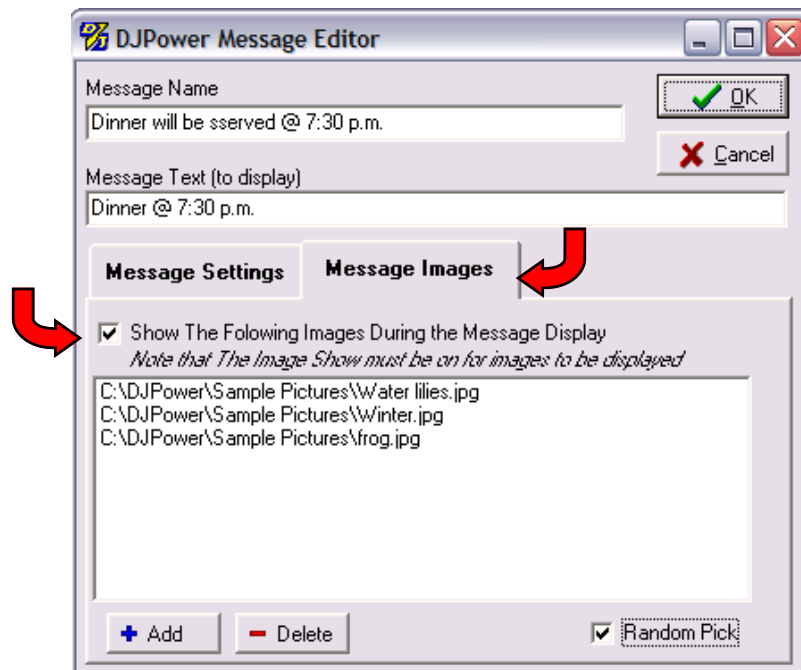

CREATING A NEW MESSAGE

To make a new message, click on the “Add” button. This will open the DJPower Message Editor window.

Message Images

Click on the “Message Images” tab. This will allow you to call any number of images from any number of folders and list them in this window. Once listed, they will be attached to the message when it is displayed, as long as the “Show The Following Images....” box is checked.

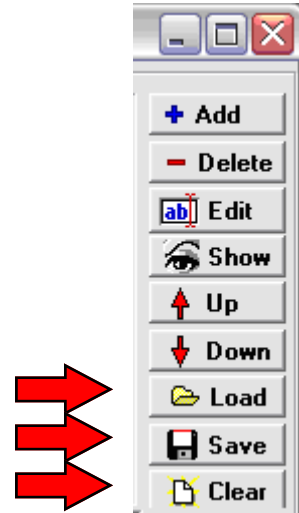

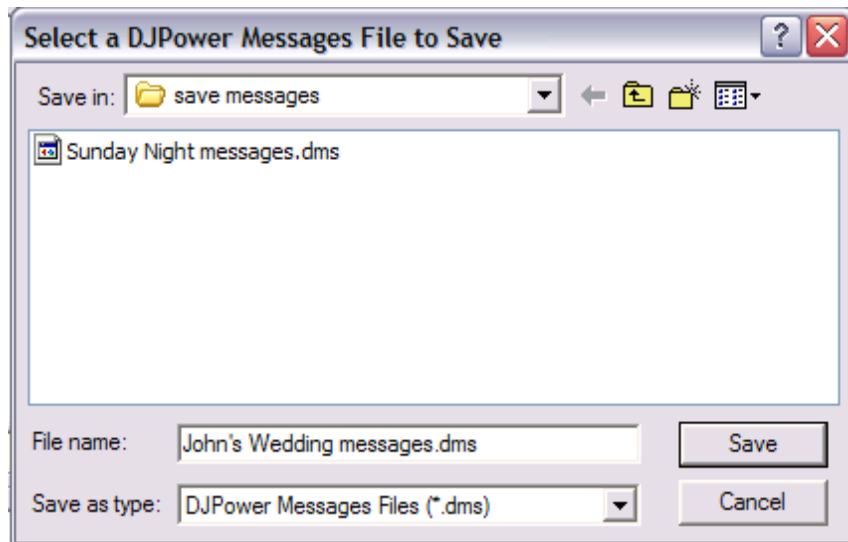

QUICK TEXT REVIEW

To easily review the actual text of any message, highlight the message. The actual text will appear in the text box. This method is useful for reviewing the message before sending it to the live screen.

MESSAGE LISTS

SAVING A MESSAGE LIST

- 1) To save a list for later playback, click on “Save” button. This will open “Save” window.
- 2) Select the directory to save the list in.
- 3) Type the desired name under “File Name”. In this example, “John’s Wedding messages”.
- 4) Click the “Save” button.
This will save the list of messages as a DMS file.

ASSOCIATION

The messages can be shown or hidden with various other output: Videos, Image Show, Live Camera, and/or Light Show (AKA Visualizer). If desired not to show the message on video screen, check off the video box.

In the above example, the messages will appear when videos are playing, as well as live camera output. But the messages will not appear while the Image Show is displayed, nor when the Visualizer is being used.

AUTO START

Checking the “Auto Start” box will start the message playback automatically when DJPower starts.

EMERGENCY MESSAGE

This is a strong tool to make live messages. Click in the emergency message box and start typing the desired message. The text will appear on the output monitors *immediately*. The Message will appear in the message box at the same time.

This message will overwrite any messages in the Message List and will stay in the message board until it is cleared by clicking on the “erase” button. Then the programmed messages will resume once there is no message in the emergency message box.
